

CERTIFICATE OF COMPLIANCE

Intenze Gen Z testing was completed by third- party lab CTL GmbH to the standards that are accepted by the EU. Each raw material that is in the Gen Z Tattoo Ink is compliant with safety standards that has been set for tattoo pigment manufacture companies. For more information you can find the safety data sheets (SDS) of each Gen Z product on our website.

With using third-party lab testing this confirms that all raw materials and finished products meet or exceed Reach Resolution 1907/2006. None of our pigments contain materials that are classified as a hazardous material and compliant under CLP (EC 1272/2008/EC). Finished products are in full compliance with REACH, ECHA, BPR, CLR. Intenze will continue to monitor raw materials that are provided by our suppliers to ensure we maintain our compliance. This will ensure that the above statement is accurate.

All INTENZE GEN Z pigments are manufactured in an exclusive facility to INTENZE that is certified in ISO 9001:2015 and ISO 22716.
